# PRISONER RUNS, AND IS SHOT

## Here and There

Editorial By ALEX. H. WASHBURN

IF YOU run a store, a service institution, or a factory, no matter how small, and even though you employ only yourself, make sure that last year's figures on your business have been reported to the Bureau of the Census. The tabulation on the Seventh Congressional District is closing this week—and Hope and Hempstead county are running behind similarly-sized communities elsewhere in the district.

**Cheese Factory to Open May 15; New Manager Here 1st**

G. M. Crow, of Searcy, is Plant Manager for Kraft Phenix Corp.

**INVITE INSPECTION**

Frank Kraft Asks Farmers to Visit Factory at Walnut and Fifth

The Kraft Phenix Cheese corporation will open its new cheese factory in Hope about May 15.

G. M. Crow, with the cheese factory at Searcy, Ark., and a veteran of 20 years' experience with the Kraft corporation, will be the Hope plant's manager.

Mr. Crow and R. F. Berry, Kraft's field agent for the state of Arkansas, will arrive in Hope this Wednesday, May 1.

This was announced Monday by Frank Kraft, factory installation man with headquarters at Denison, Texas, whose task of converting the old armory building at South Walnut and Fifth streets is nearing completion.

Mr. Kraft, member of the family whose name is associated with the dairy industry around the world, took a "Star" representative through the big new plant, which has been under construction for 30 days. The old armory building has been completely remodeled and redecorated, and most of the machinery is installed. The building measures 100 by 52 feet, and the cheese "make" room is 67 by 32.

**Unlimited Capacity**

The plant has practically an unlimited capacity for cheese production, Mr. Kraft said. It can accommodate up to 25,000 pounds of whole milk daily, with the present vat and labor-shift arrangement—but this capacity can be multiplied at will by the quick installation of extra vats and the adding of new shifts.

Four men will be employed at the beginning, including the manager; and others will be added as milk production passes from 10,000 pounds daily

**Hope Man Is Hurt as Car Overtakes**

Walter Locke Injured on Wilmot-Hamburg Road Saturday Night

Walter Locke of Hope was injured Saturday night when his automobile struck loose gravel and overturned on the Wilmot-Hamburg road.

He was in a hospital at Monticello Monday with a broken nose and scratches about the face. His condition is not believed to be serious.

It is expected that he will be removed to his home in Hope Tuesday. The accident occurred on a curve when the car struck loose gravel. No one was injured. At the time of the accident Mr. Locke was en route home from Wilmot where he is employed.

**FLAPPER FANNY SAYS:**

REG. U. S. PAT. OFF.

The manhunter's idea of big game is a man game to marry.

The tabulators have a feeling that either business is "off" in this country or else many of the smaller business houses and "one-man" factories have been overlooked. Other communities have made a systematic canvass—and we don't want our city and county to look weak by comparison when the government's "official" figures are published on the 1935 Business and Manufacturers Census.

The Star urges you, if you haven't already filled in the census blank, to get in touch with B. C. Hollis, enumerator for Hope—or, if you will telephone the newspaper office we'll have Mr. Hollis check up with you.

What we need is the names of businesses, however small, that may have been missed. Please give this your attention today.

X X X

Every 30 days the National Editorial Association—an organization of small-city daily and weekly newspapers—reprints half a dozen editorials which it judges to be the best of the month.

Here's one from the Charleston (S. C.) News:

**The Poor, the Rich, the Clowns**

Incessantly one hears complaints against the rich from some of the poor who insist on creating some of these same rich.

The wealthiest newspaper man in the United States if not in the world is William Randolph Hearst.

Who gives him his enormous wealth? The plain people, the workers, give it to him. Forty years the well-to-do and wealthy have been denouncing Hearst newspapers and the working people have been denouncing them. The "swell" stores and organizations advertise much more in newspapers of smaller circulation.

Another tremendous newspaper success is The New York Daily News, a "tabloid," said to have the largest circulation among American newspapers. The so-called refined, polished "upper class," the Wall Streeters, have little to do with supporting it, the "workers" buy it, and they have made Major Patterson, its owner, immensely rich. The financiers and aristocrats buy the "tony" newspapers.

Who gives Miss Mac West her income of more than \$300,000 a year? The rich are not one-twentieth of one per cent of the people who go to her shows, and that is true of all the popular actors and most of the popular entertainers of every kind.

If a citizen whose organizing or inventing talents bear fruit in the erection of a great factory or chain of factories giving employment to 5,000 people is a rascal and oppressor, because he is paid a salary of \$50,000 and accumulates \$3,000,000 in a lifetime, why are the publishers of cheap newspapers and the low-brow entertainers who earn double as much considered saints?

It is a singular fact that most of the prejudice against the rich has its expression in attack on those of the rich who are most useful.

The so-called "common people" seem eager to part with their last dime to the clowns.

**Italians Move Up on Southern Front**

Sasa Baneh, Second Largest Ethiopian City, Is Surrounded

ROME, Italy.—(AP)—Italy's southern army surrounded the stout defenses of Sasa, Bench, 160 miles southeast of Harar, in its drive on Ethiopia's second-largest city Monday—while the northern troops rode jubilantly on the road to Addis Ababa.

Italian dispatches said "a formidable column" of 15,000 northern troops, preceded by forces of advance guards, left Dessye by motor truck Sunday for Addis Ababa and what they believed to be the victorious conclusion of the Ethiopian war.

**Strike at Capital**

The departure eliminated the Italian effort to conquer this African nation, and Italian officers hoped it would begin the final move in the war. As the sun rose, more than 1,000 trucks, each carrying 15 men, left Dessye.

This white army column will form the spearhead of the Italian thrust. Native troops and other Italian soldiers were already far down the imperial highway on foot.

Auxiliary trucks, to replace those which might break down, and tremendous quantities of supplies went with the soldiers.

Most of Dessye's population assembled to cheer the start. Long lines of natives who have submitted at Italian headquarters watched the departure.

## Flynn Warns of New Stock Collapse

Present Rise Has Inflationary Base; 'Adjustment' Due

Forecasts Break Within Year, Followed by Recovery, Perhaps

**CREDIT INFLATION**

U. S. Has Spent 11 Billions Borrowed Money in Last 3 Years

By JOHN T. FLYNN  
Copyright, 1936, NEA Service, Inc.

NEW YORK—Who ans what has brought Cock Robin back to life?

What force is it that has revived the stock market?

Of course the general impression that recovery is setting in is sufficient of itself to give an impetus to stock prices. But as already pointed out, a mere 18 per cent rise in business activity would not be a sound basis for a 48 per cent rise in stocks. Beyond the general notion that recovery is under way—a very uncertain and at all fixed conviction—there would have to be a belief either way that recovery was going to continue for a long period or that some other factor was going to move stocks up for a while. What could this other factor be?

Unquestionably it is the feeling that some kind of inflation is under way and that it will continue for a while longer.

The force making for higher prices is a combination of these two forces plus one other. The vague yet dominating impression of recovery is spread among what might be called the investing and semi-investing or semi-speculating public which buys for the long pull. The more professional elements in the market do not share this view. But they realize that this public impression is a fertile soil to do business in. And they also realize that the improvement in profits and the rise in purchasing power is the fruit of the credit inflation under way. They are convinced besides that this credit inflation will continue for another year or so. And so out of these elements, they have put on the pressure with some response from the public and the corresponding rise in prices.

**Federal Spending Must Continue**

The confidence in inflation is, of course, based on government spending. There is no fear in Wall Street of any immediate resort to currency inflation. But Wall Street is able to understand that he expenditure of over eleven billion dollars by the administration in three years—all of this eleven billion obtained without taxation and with bank loans—is a form of credit inflation. There is eleven billion dollars of purchasing power created not in the normal way by producing anything and paying out this sum in costs, but by the sheer technique of Uncle Sam borrowing and passing the money out to business through the medium of relief, etc.

Another tremendous newspaper success is The New York Daily News, a "tabloid," said to have the largest circulation among American newspapers. The so-called refined, polished "upper class," the Wall Streeters, have little to do with supporting it, the "workers" buy it, and they have made Major Patterson, its owner, immensely rich. The financiers and aristocrats buy the "tony" newspapers.

Who gives Miss Mac West her income of more than \$300,000 a year? The rich are not one-twentieth of one per cent of the people who go to her shows, and that is true of all the popular actors and most of the popular entertainers of every kind.

Through the canyons of the financial district scurry the hundreds of messengers, runners and customers, who keep the traffic in securities moving from seller to buyer.

## Blackwood Upheld by Supreme Court

Civil Suit for District-State "Deal" Recovery, Thrown Out

LITTLE ROCK.—(AP)—The Arkansas Supreme Court in a four-to-three opinion upheld Monday the action of Circuit Judge Mann in instructing a verdict for the defendants on a suit by the state to recover \$21,714.13 from Dwight H. Blackwood, former state highway commissioner, and others.

The state charged that Blackwood, commission chairman, conspired with another member, J. Lan Williams, and others to collect money on claims by four road improvement districts.

The majority opinion held that "the acts of former highway officials do not warrant the assumption of official misconduct or conspiracy."

The court also held that the highway commission members and Blackwood bondsmen were protected from civil judgments.

Foresees Another Year of Inflation

What does this mean in the terms of the market? It means that the inflationary policy pushing the market up is going to last at least for another year. It means that, if the market continues up much further, a break is sure, but that the break may be only temporary and will be followed by a recovery. Even if the market does not go higher, there may be a temporary break, to be followed by recovery. But it also means that the whole price structure is based on a thoroughly unwholesome force and that sooner or later there must be an adjustment.

The other force in the market must be noticed. The market seems to me to be a distributors' market. That is, during 1933 and 1934, various op-

erations

Lincoln, Neb.—(AP)—John P. Wel-

ler, foreign language instructor at the

University of Nebraska, shot and killed himself Monday after wounding Professor Harry Kurz, head of the romance language department.

The shooting occurred at the university. Kurz was shot in the wrist was walking in a university hall corridor.

Weller then fled, and when surround-

ed by police near Nebraska Hall on

the campus he fired a bullet into his

chest.

## Your Baby's Health

By DR. MORRIS FISHBEIN  
Editor, Journal of the American Medical Association, and  
of Hygeia, the Health Magazine

Some babies are born at home through their parents' choice, and some because there simply isn't time for the mother to get to the hospital. In most cases, duration of child-birth for a first baby is between 16 and 18 hours, and for later babies between eight and 10 hours. There is no reason to be panic-stricken or over-worried when the first symptoms appear.

Just as soon as the prospective mother knows that child-birth is to occur in the home, a kettle of water should be set to boil, and a small pair of scissors and two pieces of tape should be dropped into the water. These are necessary to take care of the cord of the baby.

The best available room should be chosen for the mother, and should be kept warm, because birth in a warm room is much safer for both mother and baby. If the baby is born before the doctor or midwife comes, it should be wrapped immediately in a warm, clean towel and kept warm.

Of 1088 babies born in Honolulu, 543 were born during the day, and 546 during the night. Of 1000 babies born at the Chicago Lying-in hospital, 493 were born during the day and 507 at night.

The largest number of births during any single hour occurred between 3 and 4 o'clock in the morning, but that number was only a few more than were born from 9 to 10 o'clock at night and from 8 to 9 o'clock in the morning.

The modern father says: "When things go wrong, Bill, or you've made a mistake, let's talk it over. I don't expect you to always be right, but I want you to do what you think is right."

The modern girls, boys, not understanding that, have made up their own minds and acted accordingly, often only to be reprimanded.

"Yes, but you said—" they will begin, to be interrupted by some such phrase: "Yes, but you should have known better!"

After all, how can a child know better unless he is taught? Fortunately there is a kinder, more comprehensive trend in the world today. Parents and teachers are becoming wiser in their interpretations. They are granting children minds and hearts of their own. They are being counselors instead of dictators. They are showing children the right thing, instilling an appreciation of it, and leaving the decision to them. If the training has been right, they need have little fear.

Confidence Works Both Ways

Parents must trust their children, just as surely as children must trust their parents. Pulling together they will establish a sound, healthy family unit. They must confide in one another. This is a lesson fathers and

mothers have learned.

What is fortune, what is fame?  
Futile gold and phantom name,  
Riches buried in a cave.  
Glory written on a grave.

What is Friendship? something deep  
That the heart can spend and keep:  
Wealth that strengthens while we give,  
Praise that strengthens us to live.

Come, my friend and let us prove  
Life's true talisman is loyal.  
By this charm we shall elude  
Poverty and solitude.

—Henry Van Dyke.

Mr. and Mrs. Roy Anderson were Sunday guests of Mr. and Mrs. Gaines Anderson in Texarkana.

Billy Wimberly of the State Highway Department, Lewisville, Ark., spent the week end with his parents, Mr. and Mrs. J. W. Wimberly and other home folks.

Mrs. R. T. White has returned from a few days visit with friends in Little Rock.

## Prescott News in Brief

BY DALE MCKINNEY

The Koontown Minstrel that was to be given here Friday night has been postponed until Tuesday night, on account of some of the actors being ill.

Miss Virginia Sharpe was elected vice president in the Louisiana State University, in an election that was held recently by the members of the Arkansas club.

Ralph Gordon, a student in Hendrix college at Arkadelphia, spent the week end here with his parents, Mr. and Mrs. Clarence Gordon.

The Missionary society of the First Baptist church will meet Monday afternoon at 2:30 at the church.

Good time was enjoyed by the seniors Friday at Lake Hamilton, where their sponsor, Mrs. Alvern Denman took them for their last outing before they say farewell to their high school days.

## El Dorado Noses Out Hope, 4 to 2

Locals Unable to Hit in  
Pinches—Season's Opening Game Here

The Lion Ooilers of El Dorado scored a 4-to-2 victory over the Williams Lumberjacks company team here Sunday afternoon.

Failure to hit with men in scoring position cost Hope the game. The Lumberjacks outslugged the visitors, getting 13 safe blows to seven for the Lions.

In the eighth inning the Lumberjacks loaded the bases but could not push across a run. On two other occasions when a single meant two runs the Lumberjacks failed to hit.

The game Sunday evening a two-game series with El Dorado, the Lumberjacks having taken a 5 to 4 decision last Sunday at El Dorado.

Next Thursday afternoon Atlanta, Texas, comes here. The Hope Boys band will sponsor the game and will play at intervals during the contest. Part of the proceeds will go to the uniform fund.

The lineups:

	AB	R	H	E
El Dorado	5	0	2	0
Hatcher, if	5	1	1	0
Chime, ss	5	1	1	0
Ramlin, 3b	5	0	0	0
Morgan, cf	4	2	1	0
Wallace, c	5	1	1	0
Hibbard, rf	4	0	2	0
Chism, 2b	4	0	0	0
Edwards, 1b	4	0	0	0
Callaway, p	4	0	0	0
Gordon, c	1	0	0	0
	41	4	7	0
Total	42	2	13	2
Score by Innings:				
El Dorado	0 0 2 0 0 0 0 0 0			
Hope	0 0 0 1 1 0 0 0 2			

Mrs. Fanny Garrett was the week end guest of her son, Chas. Garrett and Mrs. Garrett in Little Rock.

Mrs. Ludie Thomas spent the week end with friends in Little Rock.

## Flynn Warns

(Continued from page one)

erators and institutions and corporations acquired by compulsion large blocks of securities. More recently, when Wall Street saw the definite influence of the market, more active operators began to accumulate low-priced shares. With the lift in business these people have been selling their shares to the hopeful public. How much actual manipulation has been going on to effect this it would be difficult to say.

This, perhaps, helps to explain how there has been so much activity without a corresponding increase in bank loans in the market. There has been a heavy distribution of low-priced stocks which many persons have been induced to buy for cash and without the use of market credit. Also, there has perhaps been a lot of floor trading either to help in distribution and boost stocks or merely to take advantage of the current situation. And, of course, a lot of this trading is done without either cash or credit.

This is further confirmed by the volume of trading. It has been large but not at all record breaking. Thus last year there was a lot of heavy trading, yet the total sales of shares were only \$31,665,000 or not very much more than 1934. And it was only a little over half what was done in 1933. This year, thus far, sales have been heavier than in the same months last year. That is, they have been around \$200,000,000 shares or somewhat less than 1933. This would seem to indicate that, since there is no enormous demand being exerted against the shares, the upward swing of stocks has been helped along by some of the old devices.

Securities Laws Still Ineffective

This brings us to ask—what has happened to Wall Street under the new regime—under the Securities Exchange Commission?

The answer, of course, is that nothing much has happened yet. The situation stands about as follows:

There are two acts affecting Wall Street. One is the Truth-in-Securities Act. This has been beneficial because it forces bankers or corporations putting out new issues of bonds or stocks to file with the Commission a very full account of the essential facts affecting the securities. This act has worked fairly well thus far. But it has not affected the stock exchange very much, since very few new stocks have been issued. This has been not because of the act, but because of the general investment situation.

The other act is the Securities Exchange Act, under which the Commission governs the stock market. Investors must understand that the Commission does not aim to advise investors or to aid them in their investment or speculative problems. Its business is to see that the exchange is run as a free, honest market place.

While the Commission has done some good work, it has really not done very much, as yet, to change the methods in the market.

Bank Credit Out of SEC Hands

The Commission has laid down some rules under which securities are listed with exchanges. The facts which corporations whose shares are listed are compelled to supply are specified by the Commission. But this is hardly more than the stock exchange already required in listings. And some critics have even insisted that the Commission had actually mitigated the severity of the exchange rules.

Speculation with bank credit is not

in the hands of the SEC. The power of margin rules is lodged with the Federal Reserve Board. Up to recently margin rules were scarcely more severe than any prudent brokerage house would have required. And even now, while for most active stocks margins of 55 per cent are required,

this is not much different from the requirements of a stock commission house even though, however, there has been some improvement here. But the whole agitation against speculation with borrowed funds is by no means settled. There are still in Congress, as well as in academic circles who believe that margin trading should be done away with altogether. Stock Manipulation Hard to Prove

Next, manipulation. Can brokers still manipulate stocks? And do they do it? The law contains a series of prohibitions against manipulation. One is that it is unlawful to do so. This is not very difficult to prove manipulation in any given case.

The only way to prevent manipulation is to take out of the hands of operators the weapons they use for the purpose. What are these weapons? They are in part (1) margin credit; (2) the collaboration of the specialists; (3) the very often of floor brokers; (4) fictitious trading; (5) putletry, tips, rumors, etc.; (6) options and other devices to aid brokers to accumulate large shares; (7) short selling.

Margin credit the operators still have in abundance.

The specialist still remains unchecked. The Commission has been studying this subject but has done nothing about it.

The floor trader still remains uncheked. Here again the Commission has been studying the subject but has not acted.

Fictitious trading is prohibited outright by the act. The Commission has hauled one broker—Mike Mechin, a large scale broker and operator—over the coals to prove that he conducted a lot of fictitious trading in Bellatex stock. But the trial has lasted for six months and the testimony makes up a bale of paper. Obviously the Commission cannot repeat such an effort often. One thing it can do is to make the punishment so severe when it does investigate as to make brokers fearful of being caught.

Publicity, tips, rumors, etc., are of course all made unlawful by the act.

The Commission may make rules against options, but as yet it has not done so.

Thus we see that while the Commission has been studying many subjects and has made some good investigations, notably the investigation of the whole abuse of reorganizations, it has not yet got down to brass tacks really to curb the market. If the market misbehaves, the Commission is going to be blamed.
